A lean & transparent SUPPLY CHAIN

for the sourcing of Retail Fixtures and Permanent Point Of Purchase (PPOP) equipment

WHO WE ARE

3 industry experts, with a combined experience of over 100 years, saw an opportunity to transform the Sourcing Supply Chain for Retail Fixtures and POP equipment

LeanPie was created to bring best practice principles, improved quality and increased transparency to an industry where processes are not clear, cost breakdowns are not provided and delivery delays and quality issues are common

We understand **COST** and our fundamental aim is to help clients achieve the lowest possible cost with quality and fast delivery

WHAT WE DELIVER

We are committed to providing a **SOURCING SUPPLY CHAIN** that can deliver the lowest possible cost. We achieve this by combining the following:

Cloud Technology

Lean Principles

Engineering Experts

Low-cost Country Sourcing

We ONLY hire Engineers

HOW WE DO IT

We give control back to the client. Our strategy is based on giving the client ownership for all technical specifications and providing them with access to the best possible suppliers globally. Then it is just a question of best practice process

Technical specification

Supplier assessment & certification

Cost benchmarking

Value engineering

Supply chain modelling

We ensure the client gains technical control over every item currently being sourced

We identify and assess all current sources of supply as well as identifying new and better ones

We cost benchmark all appropriate suppliers (local & overseas) for the current materials to find lowest cost We value
engineer items
to improve
production
efficiency and to
achieve
standardization

We identify the best supply chain for each market; centralized production, local production or combination of both

WHY IT MATTERS

We are confident that we can provide significant cost savings whilst enhancing quality and delivering within tight timeframes

LEANPIE Sourcing

Best sources of supply Highly skilled engineers Technology-enabled Streamlined processes

Client Benefits

Enhanced quality
Reduced waste
Reduced cycle times

ACHIEVE at least a

20%

cost saving versus current sources of supply
